I'm the creator of these Collections!

The reason why i leaked my own Collections which i used to sell is because
"Sanix" resold them & scammed people.

So i just decided to leak them and it got Viral on the Media.

Enjoy :)

PS: This is a reupload only, i will make another Thread soon with brand new Combolists collections

I'm the creator of these Collections!

The reason why i leaked my own Collections which i used to sell is because
"Sanix" resold them & scammed people.

So i just decided to leak them and it got Viral on the Media.

Enjoy :)

>13B >6B >1B >500M >100M >50M >30M <30M

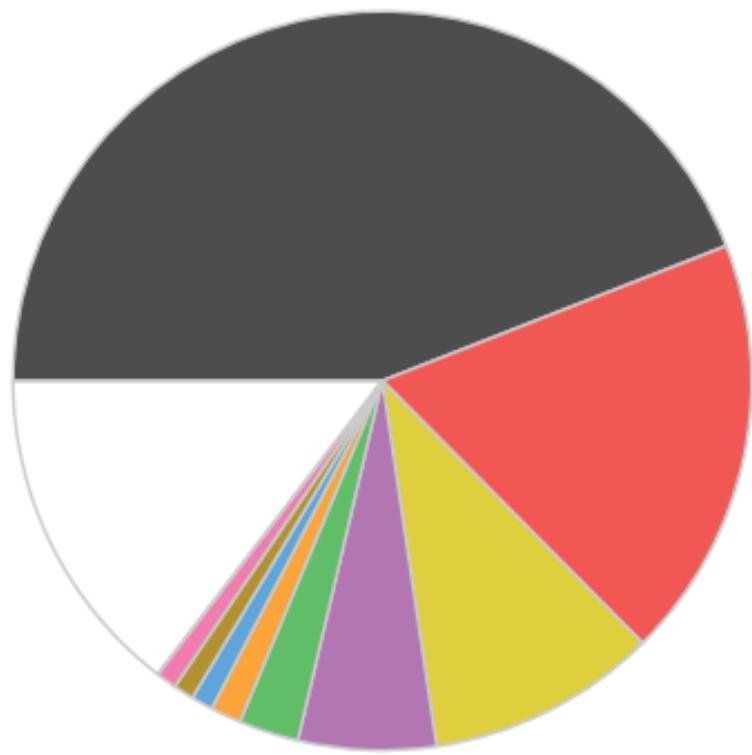

A world map where countries are colored according to their top-level domain (TLD) distribution. The legend on the left lists the TLDs and their corresponding colors: com (red), net (yellow), org (green), int (dark gray), edu (light blue), gov (medium blue), and mil (gray). The map shows a clear global pattern where 'com' is dominant in North America and Australia, while 'edu' is prevalent in the United States and 'gov' in several countries like Brazil and Russia.
