

# Getting Physical

## Meet Local Hackers Near \$AREA

Kirils Solovjovs  
26.10.2022.

# Introduction

- ◆ Possible Security lead researcher
- ◆ White hat hacker
  - ◆ Network flow analysis
  - ◆ Reverse engineering
  - ◆ Social engineering
  - ◆ Consulting clients
- ◆ <https://kirils.org/>
- ◆ twitter / @KirilsSolovjovs

# This story is based\*

- based? based on what?
- true events

## Guest network misconfiguration

Unauthorized editing of access card database

- ◆ Unattended PC
- ◆ Local administrator password
- ◆ Domain administrator access

---

This is another story

---

## Dropping a network remote access device

- ◆ MAC address spoofing

# “Unclonable” card

RFID card cloning

---

# Recommendations

---

# Recommendations

- ◆ Correctly configure client **and** network isolation
- ◆ Unattended computers should be protected with password (*bonus points: lock the room*)
- ◆ Physical connections to network should be limited, monitored and protected
- ◆ Key cards should be kept safe by using a RFID blocking sleeves

# Possible Security

- ◆ Penetration tests and audits
- ◆ Hardware and software security
- ◆ Consulting
- ◆ Premium-level service

# Possible Security services

- ◆ Penetration tests and audits
- ◆ Red team tests (attack simulations)
- ◆ Incident response
- ◆ Vulnerability research
- ◆ Reverse engineering
- ◆ Consultations
- ◆ IT security trainings

---

# Thank you for your attention!
